1 Introduction

The VM800BU is a USB controlled development module for FTDI’s FT800, which is used to develop and demonstrate the functionality of the FT800 Embedded Video Engine, EVE.

This module interfaces with a system controller via a USB port, accessing an onboard FT232H bridge chip to connect to the FT800 SPI port.

VM800BU modules support 3 different LCD panel size options and are designed for industrial or commercial environments with precision fitted bezels in either black (-BK) or pearl (-PL).

- VM800BU35A-xx is the 3.5” LCD
- VM800BU43A-xx is the 4.3” LCD
- VM800BU50A-xx is the 5.0” LCD

1.1 Features

The VM800BU utilises the FTDI FT800 Embedded Video Engine, EVE. Graphic, audio and touch features of the FT800 chip can be accessed with the VM800BU. For a full list of the FT800’s features please see the FT800 datasheet. The VM800BU has the following features:

- Integrated QVGA resolution (3.5”) or WQVGA resolution (4.3”/5.0”) LCD display
- Integrated resistive touch screen LCD panel
- On board LCD backlight LED Driver
- On board audio power amplifier and micro speaker
- FT232H USB interface controller
- Flexible 5V power supply. Powering the VM800BU using either a 2.1mm power jack or USB Micro-B port
- Precision fitted bezel in black(-BK) or pearl (-PL)

Use of FTDI devices in life support and/or safety applications is entirely at the user’s risk, and the user agrees to defend, indemnify and hold harmless FTDI from any and all damages, claims, suits or expense resulting from such use.

3 Hardware Description

Please refer to section 3.2.2 for connector settings. Some VM800BU jumpers must be set to work properly with your system.

3.1 VM800BU module

Figure 3-1 - VM800BU module profile 3.5” display version

Figure 3-2 - VM800BU module profile 4.3” display version

Figure 3-3 - VM800BU module profile 5” display version

NOTE: Also available in pearl.

The VM800BU module is intended for direct use into existing applications that require a display. This module is suitable for interfacing with a system that has a USB Host port.
The VM800BU module is available in multiple options: 3.5, 4.3 or 5.0 inch display options. The main functions of the VM800BU are as follows:

- Micro USB connector
- 2-pin connector for power supply
- 3.3V regulator: Takes 5V input and outputs 3.3V for on-board circuits
- LCD touch screen panel
- 3 stage audio filter and power amplifier
- 8Ω speaker
- Audio line out option
- FT232H enabled USB to SPI Bridge
- Precision fitted bezel

3.2 Physical Descriptions

3.2.1 PCB layout

The VM800BU module PCB layouts are illustrated in Figure 3-4 and Figure 3-5. Boards are four-layer, approximately 1.6 mm thickness.

![Figure 3-4 - VM800BU module PCB view, 3.5” display version](image-url)
3.2.2 VM800BU Connectors

Connectors and jumpers are described in the following sections.

- **CN1- Micro USB Receptacle**

  This receptacle is for 5V input to power the board. This also has USB functionality.

5 Hardware Setup Guide

5.1 Power Configuration

There are 2 methods of powering the VM800BU board.

1) USB Power(5V) - Connect USB power through micro-USB cable to CN1
2) DC IN(5V) - Connect 5V to CN2

The following table summarise how to power the VM800BU board using the various methods.

<table>

5.2 MPSSE Setup

To provide a quick start with the VM800BU development board, Windows based sample projects including source code are provided for users to get a touch and feel experience with the VM800BU. An overview of the process is provided in the following paragraphs with more details in AN_245_VM800CB_SampleAPP_PC_Introduction.

MPSSE is a “multi purpose synchronous serial engine” interface available in some FTDI devices (e.g. FT2232D, FT232H, FT2232H and FT4232H). This engine allows users to bridge from a USB port to an I^2C or SPI interface. Sample code is available for driving the FT800 over this interface with a FT232H device.
Figure 5-1 – VM800BU Connects to PC through USB.

Hardware Setup

- Connect a USB cable (suggest FTDI accessory VA-FC-1M-BKW or VA-FC-1M-BLW) from the VM800BU USB port to the PC USB host port or self-powered hub port.
- The PC or hub will supply power to the VM800BU.

Software Setup

- Launch the demo application based on MPSSE from the PC.
The demo application notes can be found at following link:
 AN_245_VM800CB_SampleAPP_PC_Introduction
The demo application examples can be downloaded at following link:
6 Assembling the Bezel and Panel Mounting

Figure 6-1 - VM800BU Panel Mount (Front view)

Figure 6-2 - VM800BU Panel Mount (Rear view)
6.1 3.5” Dimensions

The TFT Touchscreen Mounting Frame is designed to mount to a 1.5mm thick Front Panel. If mounted to a Front Panel thicker than 1.5mm, longer mounting studs or screws should be used to accommodate the difference.

The Mounting Frame has been designed to work with projection welded studs or oct screws "A" or goss studs "B". For a 1.5mm thick Front Panel use M3 x 8 long welded studs.
M3 x 10 long countersunk screws or
M5 x 10 long pressed studs

When using countersunk screws to assemble the Mounting Frame, the screws should be located at the 'A' position.

Figure 6-3 - VM800BU 3.5” panel mount dimensions
6.2 4.3” Dimensions

The TFT Touchscreen Mounting Frame is designed to mount to a 1.5mm thick Front Panel. If mounted to a Front Panel thicker than 1.5mm, longer mounting studs or screws should be used to accommodate the difference. The Mounting Frame has been designed to work with projection welded studs or cut screws 'A' or press studs 'B'. For a 1.5mm thick Front Panel use - M3 x 8 long weld studs, M3 x 10 long countersunk screws, or M3 x 10 long pressed studs.

When using countersunk screws to assemble the Mounting Frame, the screws should be located at the A position.

Figure 6-4 - VM800BU 4.3” panel mount dimensions
6.3 5.0” Dimensions

The TFT Touchscreen Mounting Frame is designed to mount to a 1.5mm thick Front Plate. If mounted to a Front Panel thicker than 1.5mm, longer mounting studs or screws should be used to accommodate the difference.

The Mounting Frame has been designed to work with projection sealed studs or cast screw 'A' or press studs 'B'. For a 1.5mm thick Front Panel use - M3 x 8 long sealed studs.

M3 x 10 long countersunk screws or M3 x 10 long pressed studs.

When using countersunk screws to assemble the Mounting Frame, the screws should be located at the ‘Y’ position.
