

## FTDI IC REACH Statement

REACH is a new European Community Regulation on chemicals and their safe use (EC 1907/2006). It deals with the **R**egistration, **E**valuation, **A**uthorization and Restriction of **C**hemical substances.

FTDI supports the aim of REACH in improving the protection of human health and the environment through the better and earlier identification of the intrinsic properties of chemical substances. FTDI will meet all REACH requirements, where applicable, and is committed to provide our customers with information concerning the material content of FTDI IC products in accordance with any relevant REACH requirements.

As a manufacturer of "articles" which do not intentionally release chemical substances, FTDI IC products and packaging are not subject to the REACH registration requirements.

FTDI are not involved in the manufacture of any chemicals. It is the legal responsibility of FTDI's material suppliers to ensure the chemicals used in the manufacture of any FTDI IC products are registered with the European Chemical Agency (ECHA).

Where applicable, FTDI are currently REACH compliant and are constantly reviewing any legislation changes.

FTDI have reviewed their material suppliers. None of the materials contain any of the 73 currently listed SVHCs, which include newly added chemicals in January 2010, March 2010, June 2010, December 2010, June 2011 and December 2011.

On behalf of Future Technology Devices International Ltd,

A handwritten signature in black ink that reads "Fred Dart".
